The Auto Age

One-hundred years ago the Ford Model T was introduced. In the years to follow, vehicle technology and innovation continued to evolve.

The Model T changed the face of transportation when Henry Ford began using the conveyor belt for production, making cars affordable for the masses. Following in its footsteps came the "family utility" vehicles, the station wagon (1947), mini van (1983) and SUV (1990), accommodating the growing needs of busy families.

Hybrid technology emerged as consumers demanded fuel efficiency. Honda's Insight, the first hybrid marketed in the U.S. led the way for many other top automakers to develop their own line of gas/electric vehicles.
